

# PAS2035 Retrofit Solutions

Software and services to enable  
the delivery of PAS2035 and  
ECO compliant measures

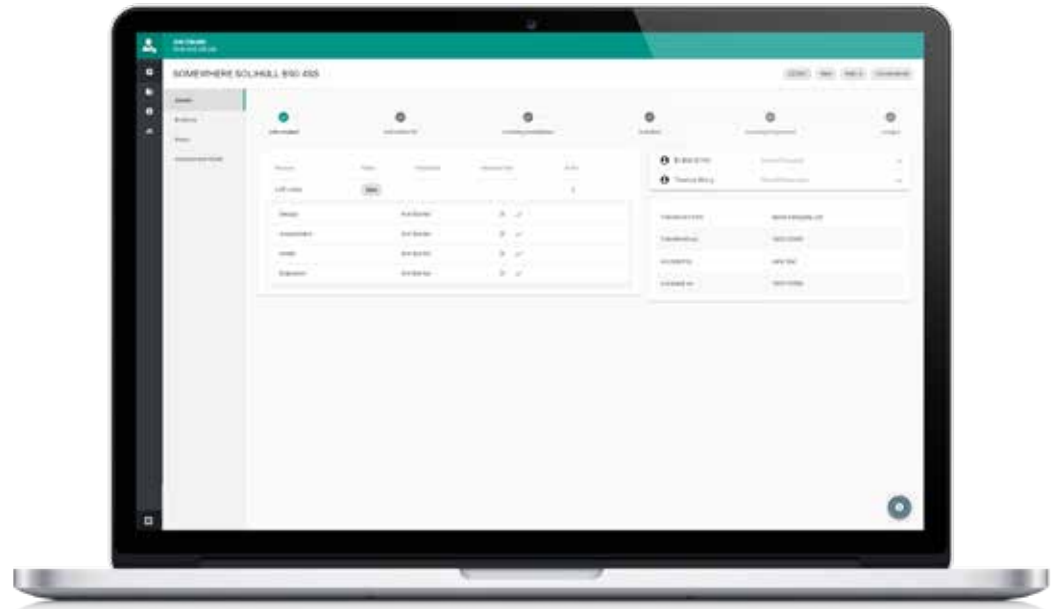

Our mobile and desktop software provides Assessors and Coordinators with an effective tool for completing PAS2035 compliant Retrofit work.

Our software is designed for qualified Retrofit Assessors and Coordinators to carry out Retrofit assessments and lodgements in accordance with PAS2035.

Our mobile software enables Assessors to capture all the necessary information on-site based on the Risk Path of the project, determined through the on-device PAS2035 Risk Assessment, and submit to our PAS Hub solution for onward progression to sign-off, install and lodgement. The App integrates with CoreLogic's floor plan App, and includes technical surveys and ECO3 Ofgem compliant evidence documents.

Combined with our desktop PAS Hub software, companies can manage Retrofit work, including instruction of Retrofit Coordinators, transfer of work between companies, project sign-off and lodgement onto the TrustMark data warehouse.

## PAS2035 Retrofit App Features:

- PAS2035 and ECO3 compliant surveys and documentation
- RdSAP calculations to enable automated Improvement Option Evaluation generation
- PAS2035 Risk Assessment
- Integrated Floor Plan App

## PAS Hub Features:

- Instruct Retrofit coordinator
- Model and generate Improvement Option Evaluation reports
- Transfer work between companies
- Review assessment, design and installation documentation
- Project sign-off and TrustMark lodgement

## Retrofit Coordinator Service:

CoreLogic is a TrustMark licenced provider of PAS2035 Retrofit Coordinators. We are working in partnership with ecmk Accreditation to enable companies without the in-house skills or capacity to outsource PAS2035 Retrofit work to ecmk accredited Retrofit Coordinators.

The CoreLogic Retrofit Coordinators will oversee your Retrofit projects. All work will be managed using CoreLogic software, PAS2035 Retrofit App and PAS Hub, providing real-time visibility, ensuring you have complete control of progress. Project sign-off and final lodgement to the TrustMark data warehouse is carried out by the CoreLogic Retrofit Coordinator, but only on your authorisation so that ultimately it remains under your control. ecmk Retrofit Coordination lodgement fees are included in the Retrofit Coordinator service.

## How it works

Retrofit Assessor completes PAS2035 and ECO3 compliant surveys electronically on the iPad and submits to PAS Hub.

Retrofit Assessment reports are automatically generated on PAS Hub.

A Retrofit Coordinator is instructed.

The Retrofit Coordinator produces Improvement Option Evaluation report.

The Retrofit Coordinator reviews documentation and signs off the project.

The Retrofit Coordinator can then lodge the project on the TrustMark data warehouse.

# About us

CoreLogic UK empowers the Property Services Industry through Technology, Data and Connectivity.

The markets we serve include energy, mortgage finance, property surveying, residential estate agency and insurance.

Our solutions help clients to streamline operations, improve performance, make smarter decisions and mitigate risk.

We deliver value and work collaboratively with our clients, by listening to their needs. We address challenges and act quickly to present innovative and cost-effective technological and data driven solutions.

10+

million total surveys completed using CoreLogic UK mobile Apps

3+

million EPCs lodged using CoreLogic UK mobile Apps

2+

million ECO installs processed via CoreLogic UK platforms

£12+

billion saved on fuel bills over the lifetime of ECO measures processed via CoreLogic UK platforms
