

Retrofit Assessment Service

3-Tier Retrofit Assessment
Service with enhanced visual
property inspection options

We offer a 3-Tier Retrofit Assessment Service to support your operations. Whether you need a qualified Retrofit Assessor to carry out a standard retrofit assessment, or you're looking for an enhanced assessment, using the latest virtual and drone technology.

Our services can incorporate a detailed visual assessment element, including a digital property twin, architectural level floor plans, property condition photography and external aerial imagery.

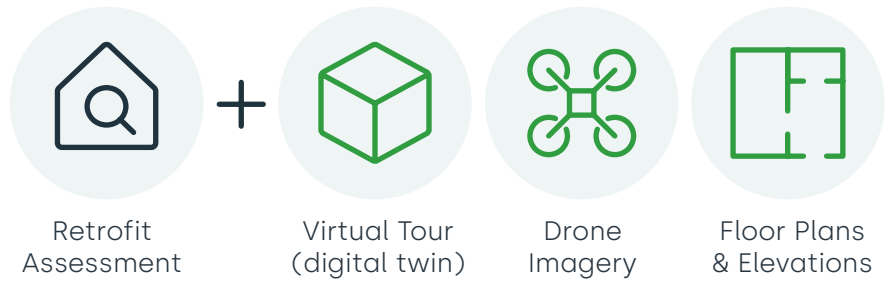

RA ■ Retrofit Assessment (*project based deployment*)

RA² ■ Virtual Tour, Floor Plans & Drone Imagery

RA³ ■ Retrofit Assessment + Virtual Tour, Floor Plans & Drone Imagery

You benefit from:

- Reduced project costs with fewer site visits needed
- No miss-quoting or install fails due to incorrect measurements
- Detailed three dimensional digital twin of the entire property
 - Add annotations inside the digital twin, using tags & labeling
 - Take measurements of the property directly from the digital twin
- Architectural level measured plans and elevations
- Thorough roof condition surveys using drone photography
- Ability to re-evaluate and visit the property 'virtually' at any time
